Investment Objective

Silver [Ag] is a noble metal with a high resistance to corrosion and oxidation and has the best thermal and electrical conductivity of all metals making it indispensable in our high-tech and green world. It also has antimicrobial and non-toxic properties which make it useful in medicine, purifying water as well as other consumer products.

Precious Metals reached previous All Time Highs in 2011 with a following bear market. Now in 2020 we got a new ATH in gold and the silver to gold ratio is getting lower [natural occurrence 16:1]. Close to a physical shortage and often only a byproduct for the largest miners the dynamics for very high prices and a sweet spot for focused silver miners are in place.

Holdings

Portfolio Holdings Target Weight Allocation. Live percentage may differ due to holdings change of value/cash flows.
