Investment Objective

Silver [Ag] is a noble metal with a high resistance to corrosion and oxidation and has the best thermal and electrical conductivity of all metals making it indispensable in our high-tech and green world. It also has antimicrobial and non-toxic properties which make it useful in medicine, purifying water as well as other consumer products.

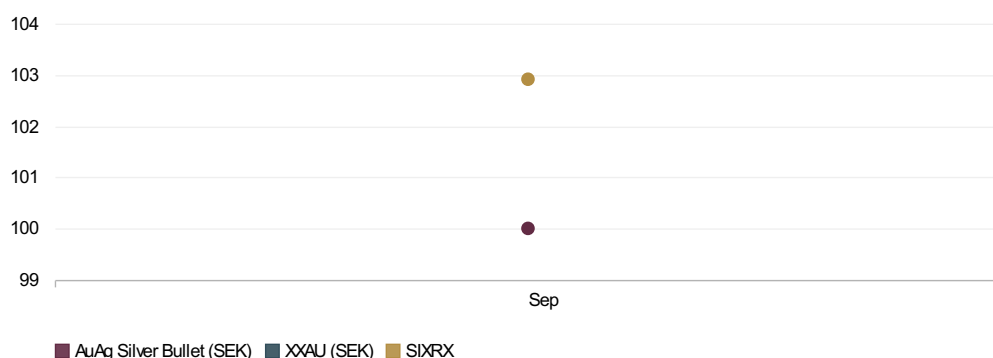

Precious Metals reached All Time Highs in 2011 with a following bear market. Now prices are turning and Silver is low priced compared to Gold [natural occurrence 16:1]. Close to a physical shortage and at the same time often only a byproduct for the largest miners the dynamics for very high prices and a sweet spot for focused silver miners are in place.

Monthly Commentary

Published by Finwire - Silver gick från 18,38 via en topp på 19,54 till att försvagas och landa på 17,04 eller -7,3% (i SEK -7,2%). Marknaden var kraftigt överköpt av retail-investerare. Commercials som gått kort och haft (har) enormt stora realiserade förluster i sina böcker var i starkt behov av att en korrektion. En korrektion som nu förstärks då kursen brutit ner och igenom 50-dagarsnittet. De mer volatila ädelmetallsgruvbolagen backade runt -10,6% vilket i relation till råvarans rörelse är en relativt modest reaktion och skall ses mot bakgrunden av ett mycket starkt rally de tre föregående månaderna på +41,6% (i SEK +44,0%).

Avkastning jämförelseindex 2019: +26,9% (i SEK +37,7%).
