"I view gold as the primary global currency"

Feb 2017, Alan Greenspan

"Gold [Au] is the only currency, along with Silver [Ag], that does not require a counterparty signature. No one refuses gold as payment to discharge an obligation. Credit instruments and fiat currency depend on the credit worthiness of a counterparty."

Three JPMorgan metals traders charged with market manipulation

US prosecutors allege 'massive, multiyear scheme' to defraud customers

Henry Sanderson and Neil Hume in London SEPTEMBER 16 2019

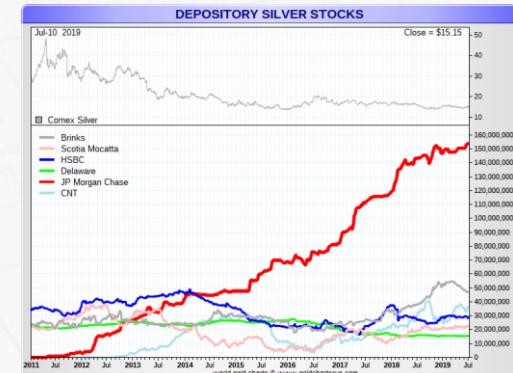

US prosecutors have charged three JPMorgan metal traders with a "massive, multiyear scheme" to manipulate markets and warned they were continuing to probe higher echelons at the largest US bank.

Michael Nowak, head of precious metals trading, was charged on Monday along with two colleagues, Gregg Smith and Christopher Jordan, on federal racketeering charges normally used to take down organised crime syndicates.

The indictment alleged that the three traders engaged in "widespread spoofing, market manipulation and fraud" while working at JPMorgan, which along with HSBC dominates global flows of gold and silver trading.

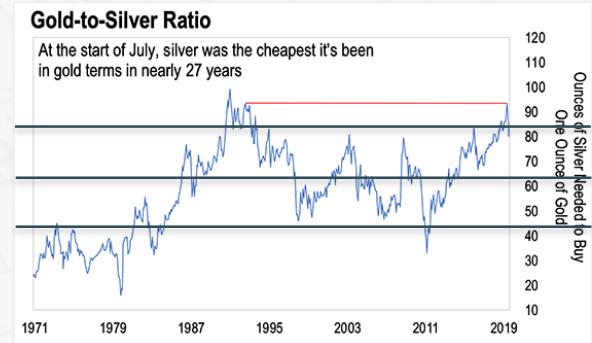

They placed orders they intended to cancel before execution in an effort to "create liquidity and drive prices toward orders they wanted to execute on the opposite side of the market", it said.

The case will increase scrutiny over global precious metals markets and the dominance of large banks such as JPMorgan, with prosecutors indicating more senior executives and other banks are under investigation.

**AuAg Fonder: Lanserar
"Sveriges kanske mest
riskfylda fond" efter
sommaren, fokus på
silver**

"Det är kanske inte hedgen i en portfölj
för att känna sig trygg, utan det är en
marknad som går upp 500–600 procent
när den går upp, och sen går det ner 80
procent när det går ner", säger han.

Fonden kommer att tillgängliggöras i
hela EU, och Eric Strand bedömer att den
har potential att bli populär även
utanför Sveriges gränser, eftersom det
inte finns någon liknande fond på
marknaden i dag.

Key Highlights

- Silver - an element with indispensable properties
- A focused portfolio with 20-30 equities and high return potential
- Low correlation with the ordinary stock market

Investment Objective

Silver (Ag) is a noble metal with a high resistance to corrosion and oxidation and has the best thermal and electrical conductivity of all metals making it indispensable in our high-tech and green world. It also has antimicrobial and non-toxic properties which make it useful in medicine, purifying water as well as other consumer products.

Precious Metals reached All Time Highs in 2011 with a following bear market. Now prices are turning and Silver is low priced compared to Gold (natural occurrence 16). Close to a physical shortage and at the same time often only a byproduct for the largest miners the dynamics for very high prices and a sweet spot for focussed silver miners are in place.

Published by Finmire - Silver gick från 18,38 via en topp på 19,54 till ett årsmedeldiagram och lätta på 17,04 eller -7,3% i SEK -7,2%. Marknaden var kraftigt överkört av retail-investerare. Commercials som gjort kort och hattit enorm stora överdele förstater i sina böcker var i stark behov av en korrektion. En korrektion som nu förstärks då kursen brutit ner och igenom 50-dagsmedeldiagram. De mer tekniska teknologisgrubolagen har under senaste året -10,5% vilket i relation till rövarans rörelse är en relativt modest rörelse och skal ses mot långt längre sikt. Detta har också lett till att silverpriset i handelsområde på +4,6% i SEK +4,0%.

Avkorting plattformindex 2019 - +26,9% i S&P +27,7%.

*"In folklore, a **bullet cast from silver** is often one of the few weapons that are effective against a werewolf, witch, vampire, or other monsters. The term is also a metaphor for a simple, seemingly magical, solution to a difficult problem: for example, penicillin was a **silver bullet** that cured many bacterial infections."*
